

Managed Intelligence Provider

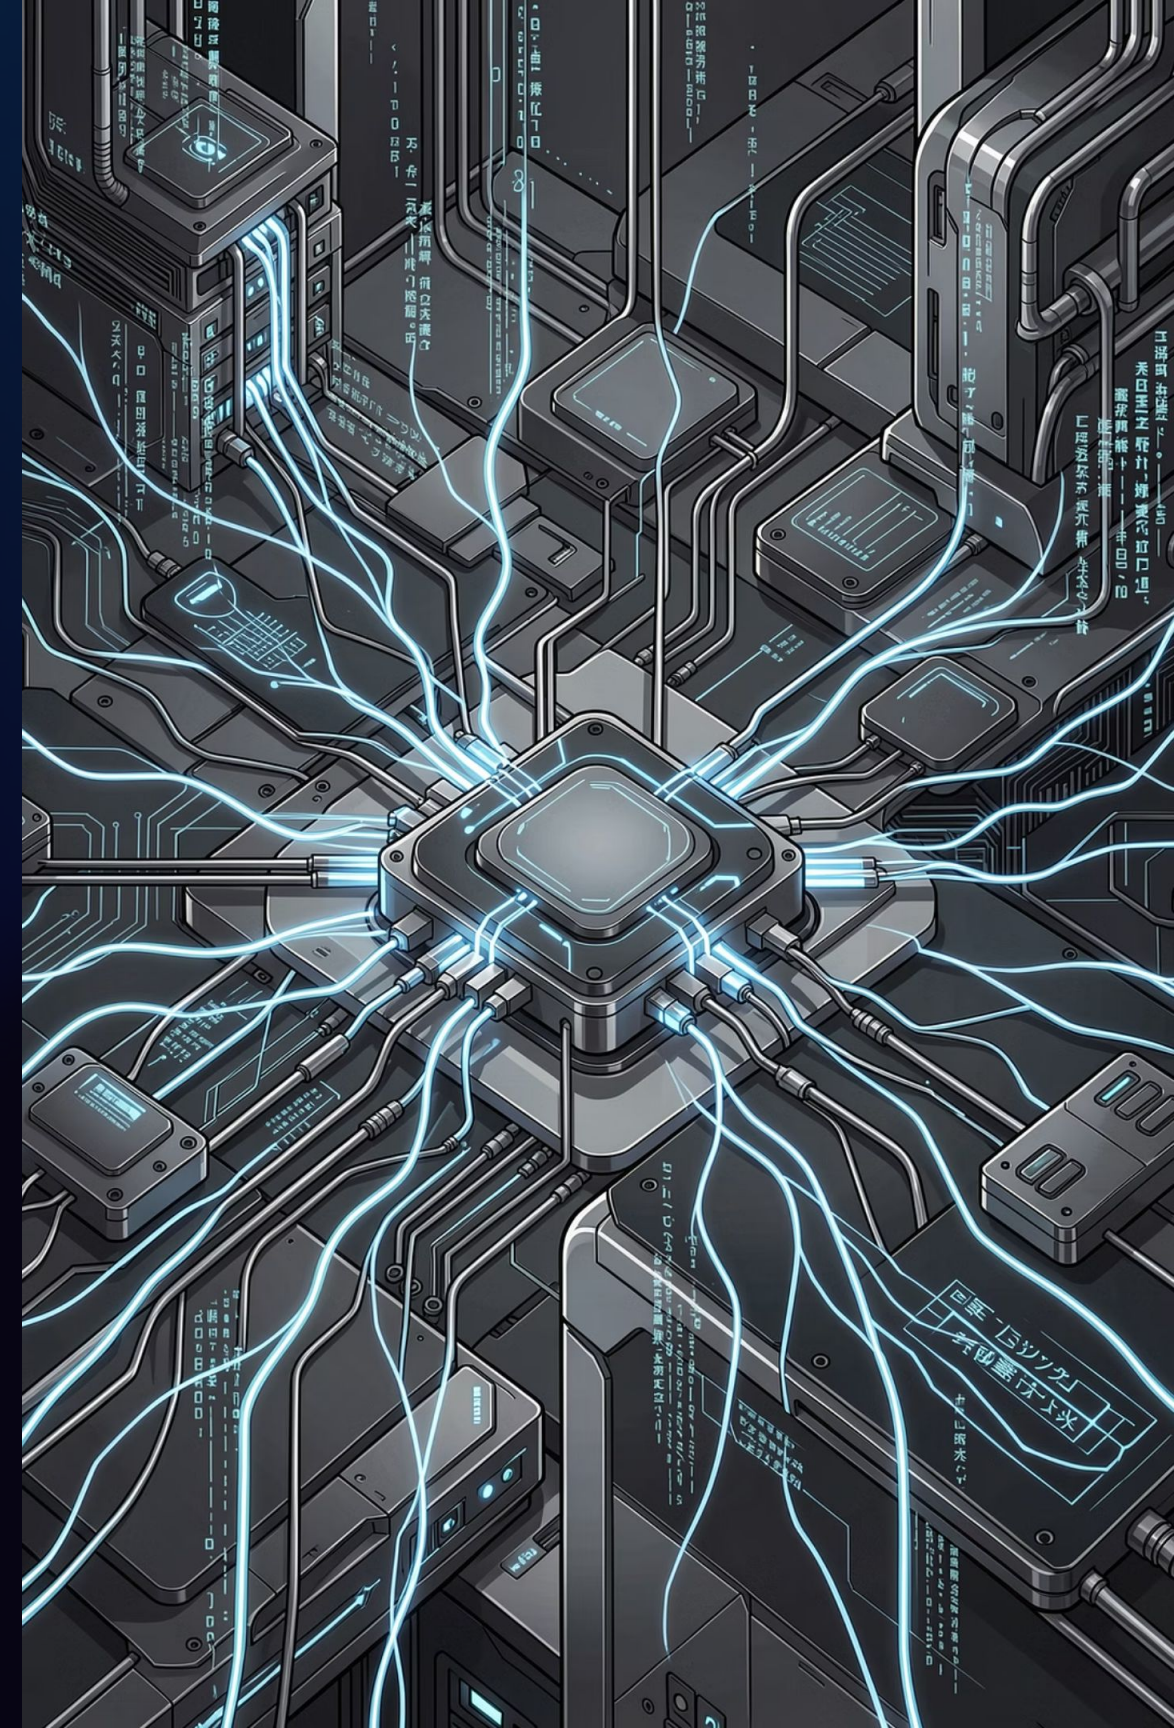

Intelligence in Motion. Resilience by Design.

Strategic Client Briefing

NEXTMIP

INTELLIGENCE & RESILIENCE IT SOLUTIONS

The Strategic Shift in IT

Legacy MSP: The Risks

- Reactive "break-fix" mentality creates downtime
- Siloed, disparate tools cause sprawl
- High manual overhead slows response
- Opaque pricing structures
- Vulnerable to AI-driven threats

Next MIP: The Future

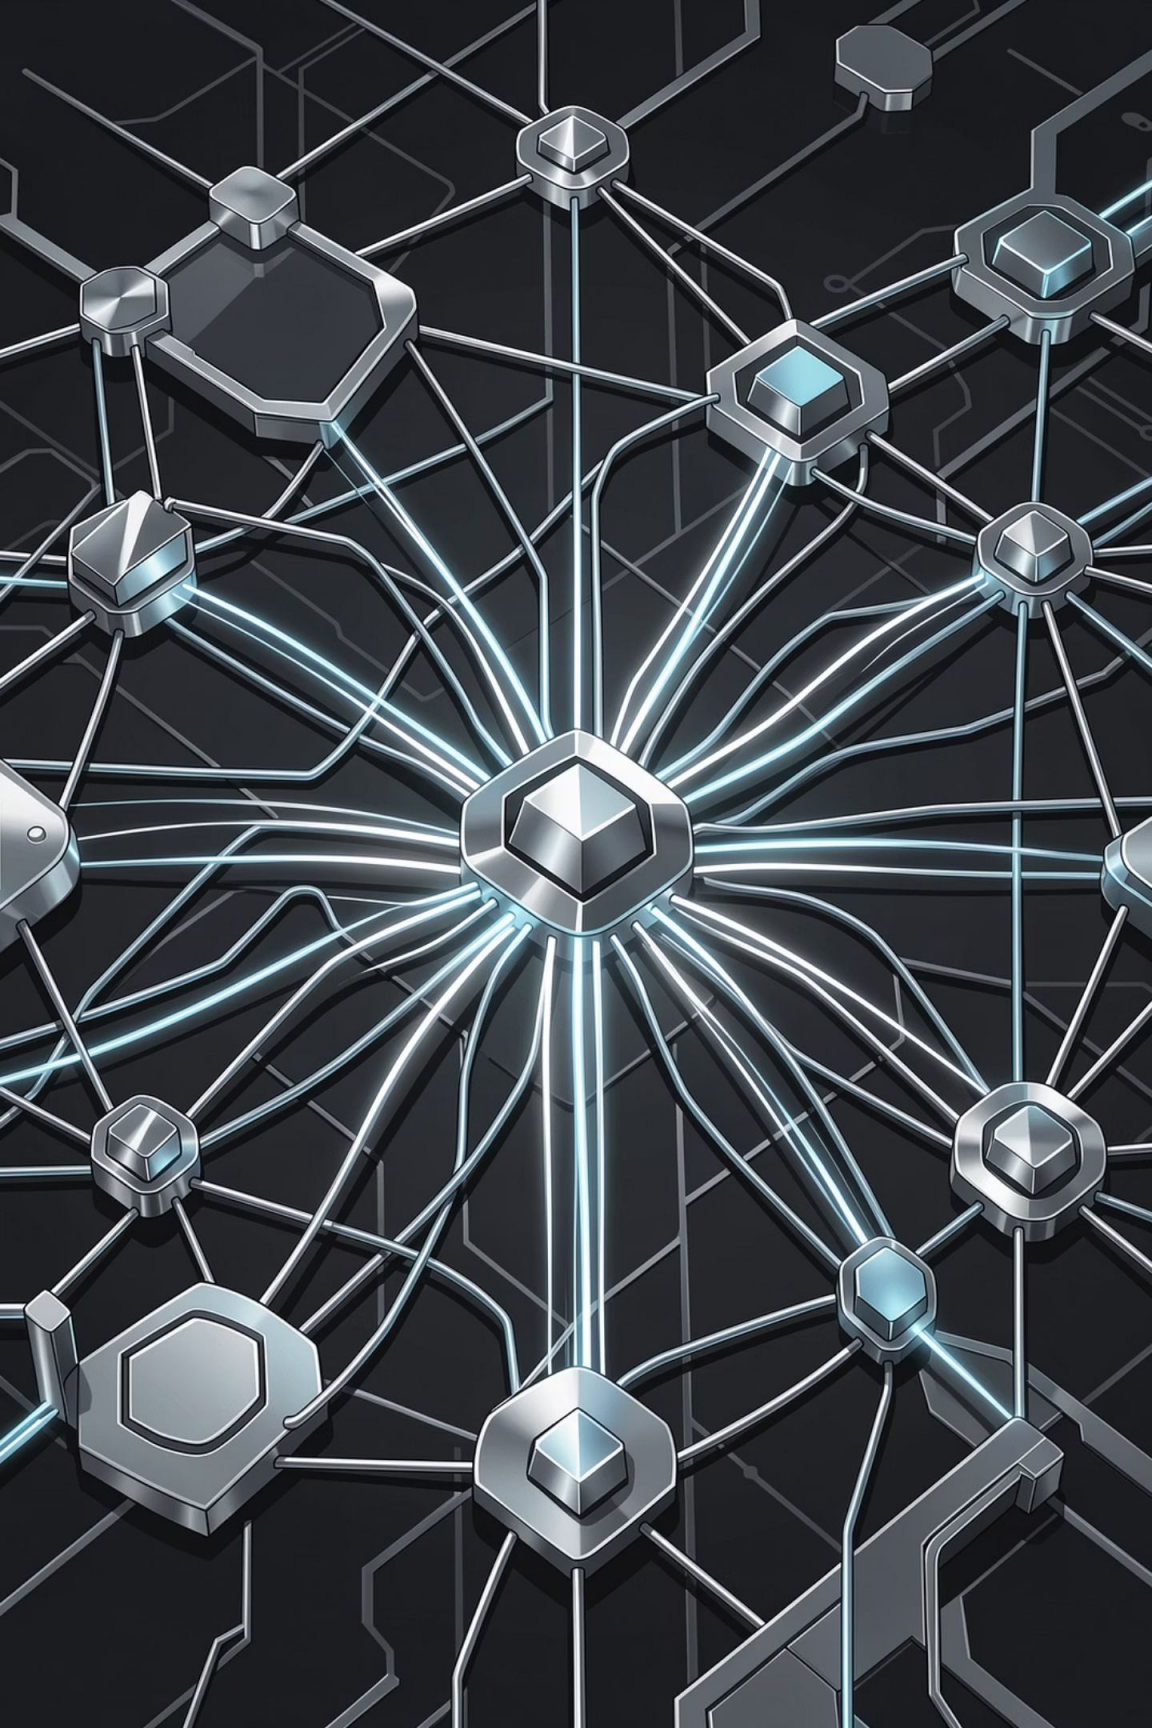

- Predictive, autonomous resilience
- Integrated M365-first ecosystem
- AI-driven efficiency with low friction
- Value-based outcome pricing
- Proactive AI governance and protection

NEXT MIP

INTELLIGENCE & RESILIENCE IT SOLUTIONS

Defining the MIP

Predictive Resilience

Shifting from reactive maintenance to predictive, autonomous resilience that prevents issues before they occur.

Integrated Nervous System

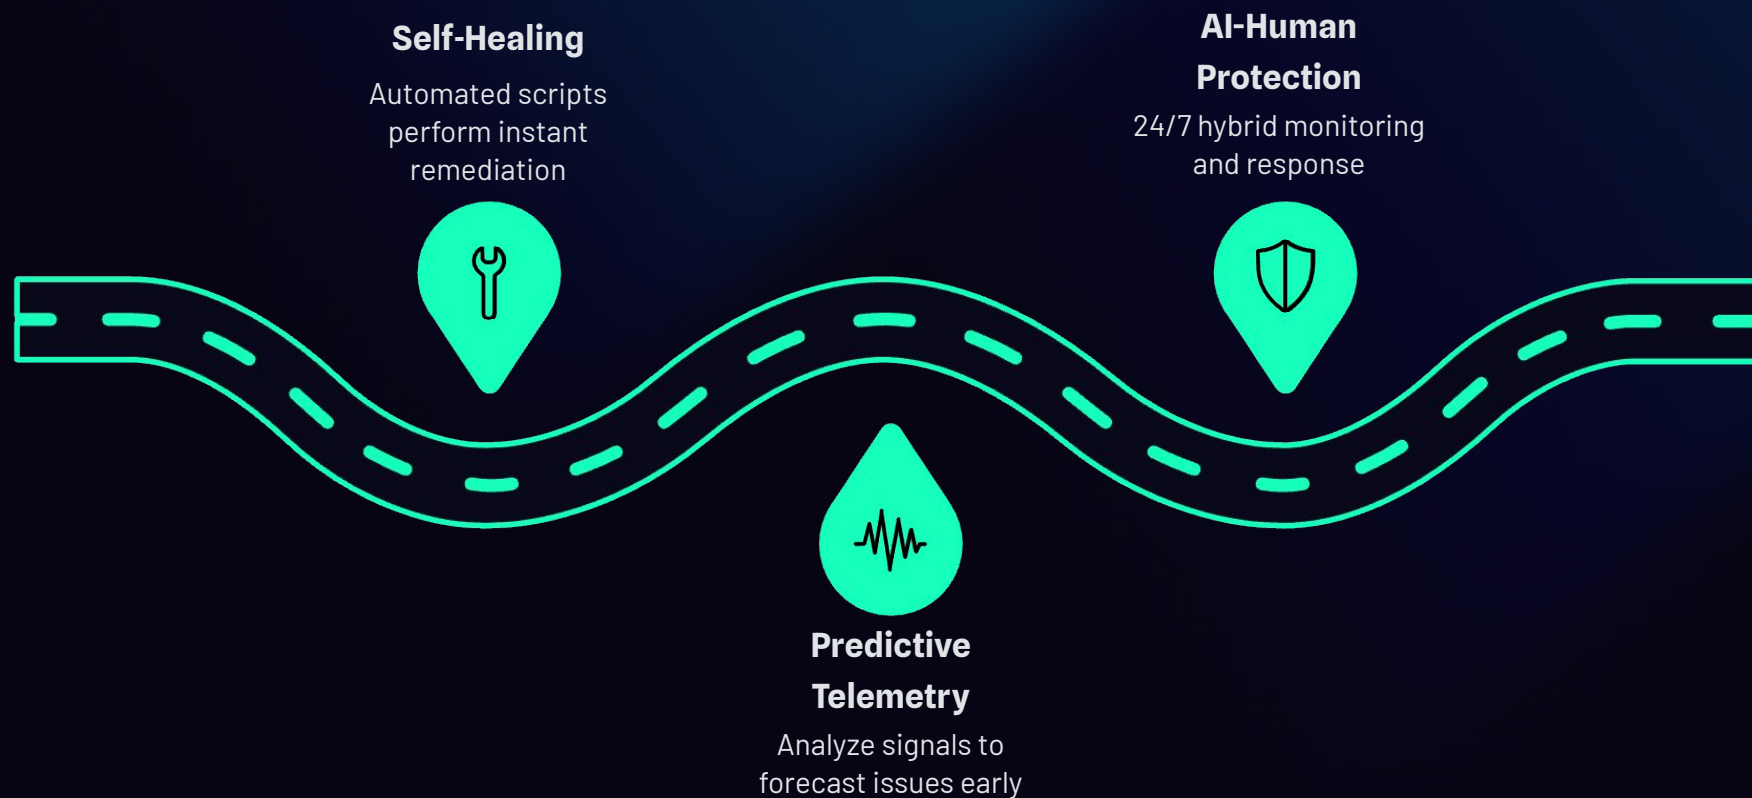

Proprietary integration of intelligent tools that communicate seamlessly, creating a unified security and operations platform.

Proactive Remediation

Identifying and resolving issues before employees notice, ensuring zero-friction productivity and accelerated growth.

Autonomous Resilience in Action

Our autonomous resilience framework combines intelligent automation with human expertise to create an impenetrable defense.

Self-Healing Systems

Automated scripts deliver instant remediation—handling restarts, lockouts, and patches without human intervention.

Predictive Telemetry

Advanced analytics predict hardware failures and performance issues weeks in advance, eliminating unexpected downtime.

24/7 AI-Human Shield

Our hybrid SOC neutralizes threats in milliseconds, combining machine speed with human intelligence.

Your 24/7 Security Shield

MDR & SOC

Huntress provides persistent threat hunting and ransomware protection with advanced detection.

Identity Guard

CIPP delivers multi-tenant Zero Trust architecture and M365 security hardening.

Email Defense

Avanan stops sophisticated AI-generated phishing attacks before they reach inboxes.

vCISO Lite

Continuous compliance auditing and strategic security roadmaps tailored to your business.

Microsoft 365 Leverage

INTEGRATION OVER SPRAWL

We maximize Microsoft 365 value while minimizing complexity—delivering enterprise-grade capabilities without the overhead of disparate tools.

Entra ID

Enterprise-grade secure identity governance with conditional access, privileged identity management, and seamless authentication.

Microsoft Purview

AI-powered data classification, protection, and governance that automatically identifies and secures sensitive information.

Power BI

Real-time data visualization and transparent reporting that transforms IT metrics into actionable business intelligence.

Maturity-Based Service Tiers

Our tiered approach meets you where you are and scales as your business evolves—from foundational stability to AI-driven innovation.

Foundation

Maintenance & Uptime

Gorelo RMM, automated patching, M365 best practices implementation, and 24/7 monitoring.

Resilience

Security & Recovery

Huntress MDR, Avanan email security, CIPP identity protection, vCISO Lite services, and backup strategy.

Intelligence

AI Growth & Compliance

Azure AI integration, IBM Watsonx deployment, GCC High compliance readiness, and advanced automation.

Why NEXT MIP

Strategic Technology Leadership

Our team brings decades of enterprise experience combined with cutting-edge AI expertise, backed by strategic partnerships with the world's leading technology providers.

Microsoft Partner

Advanced specialization in security, modern work, and cloud solutions with direct engineering support.

Amazon AWS

Certified cloud infrastructure expertise for scalable, resilient hybrid and multi-cloud architectures.

IBM Watsonx

AI and machine learning integration bringing enterprise-grade intelligence to your operations.

Google Cloud

Advanced data analytics and AI capabilities for comprehensive business intelligence solutions.

From Cost Center to Growth Engine

85%

Productivity Gain

Client teams reclaim time previously lost to IT friction and security incidents.

95%

Risk Mitigation

Security threats neutralized through proactive defense and continuous monitoring.

70%

Overhead Saved

Operational costs reduced through automation and intelligent resource allocation.

Measuring What Matters

We measure success by hours saved and risks neutralized—not tickets closed. Our value-based approach focuses on business outcomes: accelerated growth, reduced risk, and empowered teams.

Every engagement includes transparent reporting on productivity gains, threat prevention, and operational efficiency improvements.

14-Day Rapid Integration

From assessment to full protection in two weeks—our proven onboarding process delivers immediate value with minimal disruption.
